

EPALE conference in the city of Aachen, famous for its annual KARLS-PREIS for engaged and outstanding Europeans
„Adult Education in Cities and Regions - a European Perspective“

8th - 9th of Sept. 2016

Here I am discussing with EPAL Senior Expert Silke Bettray about specific learning environment and spaces. Each Math-Games group is defined by the stories of its participants. This learning space is defined by the foyer of VHS Aachen, the exhibition of European Erasmus+ projects for the EPAL conference and normal participants passing through on the way to their courses.
